Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Volume Control Damper - VCD

BETEC CAD manufactures high quality volume control dampers, specially designed for use in **HVAC** Heating Ventilating and Air conditioning systems for volume, flow and pressure control of air within the ducts.

The light, medium and heavy duty construction of **VCD's** allow even distribution and flow control of air at high duct pressures and are suitable for various type of **HVAC** applications.

Blade operation, either parallel or opposed in operation fitted with tip seals to ensure minimum air leakage through the blades.

Standard Types and Models							
Product	Series	Model / Specification		Material		Blade Operation	Construction
				Frame	Blade		
VCD	B - 10	11	Single Skin	G*,S	G*, S, A,	A/B/C	Normal
		12	Double Skin	G*,A,S	G, A*,S	A/B/C	
	B - 20**	21	Single Skin	G*,S, A	G*, S, A	A/B/C	Low Leakage
		22	Double Skin	G*,A,S	G, A*, S	A/B/C	
	B - 30	31	Single Skin	G*,S,	G*, S	B	Round
		32	Double Skin	G*,S	G*, S	B	
	B - 40	41	Single Skin	G*,S	G*, S	A/B	Heavy Duty
		42	Double Skin	G*,S	G*, S	A/B	

Material Details

All types and models of volume control dampers are available in Galvanized Steel, Stainless Steel & Aluminium according to the design and application.

Sheet Metal Galvanized Steel (GI)

Zinc coating Z-22 to Z-27 as per **ASTM-A653** Standards.

Sheet Metal Aluminium (AL)

Aluminium Sheet as per Alloy **A1100** Standards.
Extruded aluminium as per Alloy **6063 A** Standards.

Sheet Metal Stainless Steel (SS)

Stainless steel **304 / 316L**.

BETEC CAD. VCD's are manufactured as per international standards and confirmed to NFPA 90 A and UL 181 standards for erosion.

Note:

* Indicates **BETEC CAD's** Standard Construction.

** Indicates **AMCA Certified**.

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Applications:

GI Construction : For **HVAC** commercial, Residential etc.

AL Construction : For Hospitals,Labs,Green Building etc.

SS Construction : For Offshore , Oil & Gas etc.

The respective alphabet indicates the type of material

G - Galvanized steel (**GI**)

S - Stainless steel (**SS**)

A - Aluminum (**AL**)

Alphabet indicates the type of blade operation

A - Parallel Blade.

B - Opposed Blade.

C - Gear Opposed Blade.

and confirmed to NFPA 90 A and UL 181

Volume Control Damper - VCD

BETEC CAD's Volume control dampers are offered with either parallel or opposed blade operation. Each style has distinguishing characteristics with regard to the type of operation.

Blade Operation

Parallel blade operation-'A'

Parallel blade damper are constructed so all the blades move in the same direction and in parallel. Parallel blade orientation is typically used when the damper operates in two positions open and close.

Opposed blade operation-'B'

Opposed blade dampers are constructed so blades next to each other move in opposite direction. Opposed blade configuration is typically used on dampers that modulate airflow.

Blade Type

'1' - 3V - Single skin blades are formed from a single thickness galvanized or stainless steel, incorporating three longitudinal V-Type grooves running the full length of the blade to increase strength. This blade is designed for low to medium, velocity and pressure applications.

'2' - Aerofoil - Double skin blades are formed of double-skin galvanized steel, stainless steel or extruded aluminum. This blade design results in lower resistance to airflow and increased strength that is typically used in high pressure systems.

Note: * Indicates **BETEC CAD's** Standard Construction.

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Note: All Dimensions are in mm

Volume Control Damper - VCD ; Normal Application

B - 10 Series

Type: Square and Rectangular

Model: VCD-GB-11A

Blade Type : 3V Single Skin ; Galvanized Construction

Blade Operation: A-Parallel, B-Opposed, C-Gear Opposed

BETEC CAD. B-10 Series volume control dampers are square and rectangular type with parallel or opposed blade operation having single skin blade design. These dampers are subjected to medium pressure applications to achieve efficient and rattle free operation.

The square and rectangular type **VCD's** are designed for handling maximum air capacities at minimum pressure drop.

Damper Performance Ratings

Operating Pressure - 4" w.g (1000 Pa.) Max.

Leakage - Class - III (Refer AMCA 500 D)

Velocity - 1500 fpm (7.5 m/s).

Standard Construction

Frame

6" x 1.18" x 18 gauge (150 x 30 x 1.2 mm) thick roll formed galvanized steel 'C' channel with Embossed type for low leakage application.

Blades

6" (152 mm) wide, 1.2 mm (18 gauge) thick galvanized steel 3V type roll formed.

Bushes

Nylon.

Mechanical Linkage

Galvanized steel linkages concealed within the frame.

Axles

12mm square galvanized steel.

Quadrant

Heavy gauge galvanized steel with position indications

Shut, 1/4, 1/2, 3/4, **Open**.

Gasket

Neoprene / foam gasket.

Optional Fittings

Gear Wheel

Gear wheels are of heat resistant Nylon placed within the frame instead of mechanical linkage for rattle free smooth operation, operated with PVC knob / Quadrant.

Bushes

Brass / Bronze / Stainless Steel.

Axles

12 mm diameter galvanized steel.

Transitions

Neck adaptor for round duct connections.

Note :

Please contact **BETEC CAD.** for customized design & additional information.

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Note:

Increments of 2" (50 mm) possible with combination of 4" & 6" blade width.

Maximum single module size is 48"x48" (1200x1200 mm).

Damper, width W > 48" (1200 mm) or H > 48" (1200 mm), is provided with a center mullion partition.

Dampers of size W or H > 800 mm will have two side linkage.

Volume Control Damper - VCD ; Normal Application

B - 10 Series

Type: Square and Rectangular

Model: VCD-GAB-12A

Blade Type : Aerofoil ; Galvanized Construction

Blade Operation:A-Parallel,B-Opposed,C-Gear Opposed

BETEC CAD. B-10 Series volume control dampers are square and rectangular type with parallel or opposed blade operation having Aerofoil double skin blade design. These dampers are subjected to medium pressure applications to achieve efficient and uniform air distribution.

The square and rectangular type **VCD's** are designed for handling maximum air capacities at minimum pressure drop.

Damper Performance Ratings

Operating Pressure - 4" w.g (1000 Pa.) Max.

Leakage - Class - III (Refer AMCA 500D)

Velocity - 1500 fpm (7.5 m/s).

Standard Construction

Frame

6"x 1.18" x18 gauge (150 x 30 x 1.2 mm) thick roll formed galvanized steel 'C' Channel with Embossed type for low leakage application.

Blades

6" (152 mm) wide, 1 mm (18 gauge) thick extruded aluminium aerofoil type.

Bushes

Nylon.

Mechanical Linkage

Galvanized steel linkages concealed in the frame.

Axles

12 mm square galvanized steel.

Quadrant

Heavy gauge galvanized steel with position indications

Shut, 1/4 , 1/2, 3/4, **Open**.

Gasket

Neoprene / foam gasket.

Optional Fittings

Gear Wheel

Gear wheels are of heat resistant Nylon placed within the frame instead of mechanical linkage for rattle free smooth operation, operated with PVC knob / Quadrant.

Bushes

Brass / Bronze / Stainless Steel.

Axles

12 mm diameter galvanized steel.

Transitions

Neck adaptor for round duct connections.

Note :

Please contact **BETEC CAD.** for customized design & additional information.

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Volume Control Damper - VCD ; Low Leakage Application

B - 20 Series

Type: Square and Rectangular

Model: VCD-GB-21B

Blade Type : 3V Single Skin ; Galvanized Construction

Blade Operation: A-Parallel, B-Opposed, C-Gear Opposed

BETEC CAD. B-21 Series volume control dampers are square and rectangular type with parallel or opposed blade operation having single skin blade design. These dampers are subjected to medium pressure applications to achieve low leakage efficient operation.

The square and rectangular type **VCD's** are designed for handling maximum air capacities at minimum pressure drop.

Damper Performance Ratings

Operating Pressure - 6" wg (1500 Pa.) Max.

Leakage - Class - I (Refer AMCA 500-D-12).

Velocity - 2000 fpm (10.1 m/s).

Standard Construction

Frame

6" x 1.18" x 18 gauge (150 x 30 x 1.2 mm) thick roll formed galvanized steel 'C' channel with Embossed type for low leakage application.

Blades

Constructional Details and Dimensions Model VCD-GB-30 Series

Standard Construction

Frame

0.7 mm (22 gauge) Galvanized sheet steel of thickness with continuous external grew on either edges to provide extra rigidity and spot welded at the joints.

Blades

0.9 mm (20 gauge) galvanized sheet steel of thickness.

Axles

8 mm Square galvanized steel.

Bushes

Nylon.

Quadrant

Heavy gauge galvanized steel with position indications Shut, 1/4, 1/2, 3/4, Open.

Optional Construction

Frame : Thickness up to 3 mm

Blade : Thickness up to 3 mm

Frame and Blade Material : Stainless Steel (304/316L).

Volume Control Damper - VCD ; Heavy Duty Application

B - 40 Series

Type: Square and Rectangular

Model: VCD - GB-41 A/B

Blade Type : 3V Single Skin; Galvanized Construction

Blade Operation : A-Parallel, B-Opposed

BETEC CAD B-40 Series Volume control dampers are square and rectangular type with both parallel blade operation and opposed blade operation with single skin blade design. These heavy duty dampers are used under high pressure and velocity conditions to achieve efficient and rattle free operation.

The square and rectangular type **VCD's** are designed for handling maximum air capacities at minimum pressure drop.

Damper Performance Ratings

Pressure - 6" wg (1500 Pa.) Max.

Leakage - Class - II (Refer AMCA 500 D)

Velocity - 3000 fpm (15 m/s).

Standard Construction

Frame

6" x 1.18" x 16 gauge (150 x 30 x 1.5 mm) thick rollformed galvanized steel 'C' channel.

Blades

6" (150 mm) wide, 1.5 mm (16 gauge) thick galvanized steel 3V type rollformed.

Bushes

Bronze.

Mechanical Linkage

Galvanized steel linkages concealed in the frame.

Axles

12 mm square galvanized steel.

Quadrant

Heavy gauge galvanized steel with position indications

Shut, 1/4 , 1/2, 3/4, **Open**.

Gasket

Neoprene / foam gasket.

Jamb Seal

0.3 mm thick Stainless spring steel.

Optional Fittings

Bushes

Brass / Stainless Steel.

Flange Holes

Available customers request, please specify.

Transitions

Neck adaptor for round duct connections.

AIR PERFORMANCE

- Tested for air performance at standard air density in accordance with ANSI/AMCA 500-D, Figure 5.3
- Data are based on a torque of 24 in-lb/ft² applied to close and seat the damper during the test.

Pressure Loss Vs Face Velocity

Pressure Drop For Models VCD - B10/20/30/40 Series.

SIZE 12" X 12"	
Air Velocity (fpm)	Pressure Drop (in. wg)
1100	0.04
1400	0.07
1600	0.09
1800	0.12
1900	0.14

SIZE 24" X 24"	
Air Velocity (fpm)	Pressure Drop (in. wg)
520	0.008
1000	0.02
1600	0.06
2000	0.1
2600	0.18

SIZE 12" X 48"	
Air Velocity (fpm)	Pressure Drop (in. wg)
520	0.01
1000	0.04
1500	0.08
2000	0.14
2600	0.22

SIZE 48" X 12"	
Air Velocity (fpm)	Pressure Drop (in. wg)
520	0.007
1000	0.02
1600	0.05
2000	0.09
2600	0.14

SIZE 12" X 12"

SIZE 24" X 24"

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

SIZE 48" X 12"

Installation Details

Selected Products of the company have been Classified / Listed / Tested by various international testing authorities.

Engineering And Performance Data - VCD

B 10/20/30/40 Series

Leakage Characteristics for Volume Control Dampers

Models VCD - B 10/20/30/40 - Leakage Curve (Blades 100% Closed Position)

AIR LEAKAGE

- Air leakage is based on operation between 32 °F and 120 °F
- Tested for air leakage at standard air density in accordance with ANSI/AMCA Standard 500-D, Figure 5.4
- Data are based on a torque of 24 in-lb/ft² applied to close and seat the damper during the test.

Maximum Allowable Leakage, cfm/ft ²				
Class	at 1 in.wg	at 4 in.wg	at 6 in.wg	at 8 in.wg
1A	3	N/A	N/A	N/A
1	4	8	10	11
2	10	20	24	28
3	40	80	98	112

Volume Control Dampers - VCD

Ordering Data

VCD	Volume Control Damper					
↑	G	Galvanized Steel (GI)				
	S	Stainless Steel (SS)				
	A	Aluminium (AL)				
	↑	G	Galvanized Steel (GI)			
		A	Aluminium (AL)			
		S	Stainless Steel (SS)			
	↑	↑	B	BETEC CAD.		
			10	Normal Construction		
			20	Low Leakage Construction		
			30	Round		
			40	Heavy Duty		
		↑	1	Single Skin 3V		
			2	Aerofoil		
			3	Perforated		
			↑	A	Parallel	
				B	Opposed	
				C	Gear Opposed	
VCD	X	X	B	X	X	X
	Frame Material	Blade Material		Series	Blade Type	Blade Operation

Note :

1) For blade type, add Series to Blade Type.
For example: VCD-GB-(10+1=11) A => VCD-GB-11A.

2) If frame and blade material is same, use single alphabet.

Example : VCD-GB-11A where G = Galvanized frame and blade.

VCD-GAB-11A where G = Galvanized frame

A = Aluminium blade.

Betec Cad certifies that the Models VCD-GAB-22B/ VCD-GB-22B/ VCD-GB-21B are licensed to bear the AMCA Seal.
